Enterprise Quality Management Software
›› Quality for SYSPRO

Scope
Our suite of quality and continual improvement modules are designed to help your company automate its journey toward excellence. With both Windows and Web/Mobile interfaces, uniPoint offers flexible on premise or cloud hosted deployment options.

Compliance
Bridging a multitude of quality standards, such as ISO 9001, ISO 13485, IATF 16949, AS9100 and FDA 21 CFR Part 11 & Part 820 Compliance, uniPoint Quality Management Software ensures you can maintain and measure the cost and frequency of quality events. It also encompasses the principles of Lean Manufacturing.
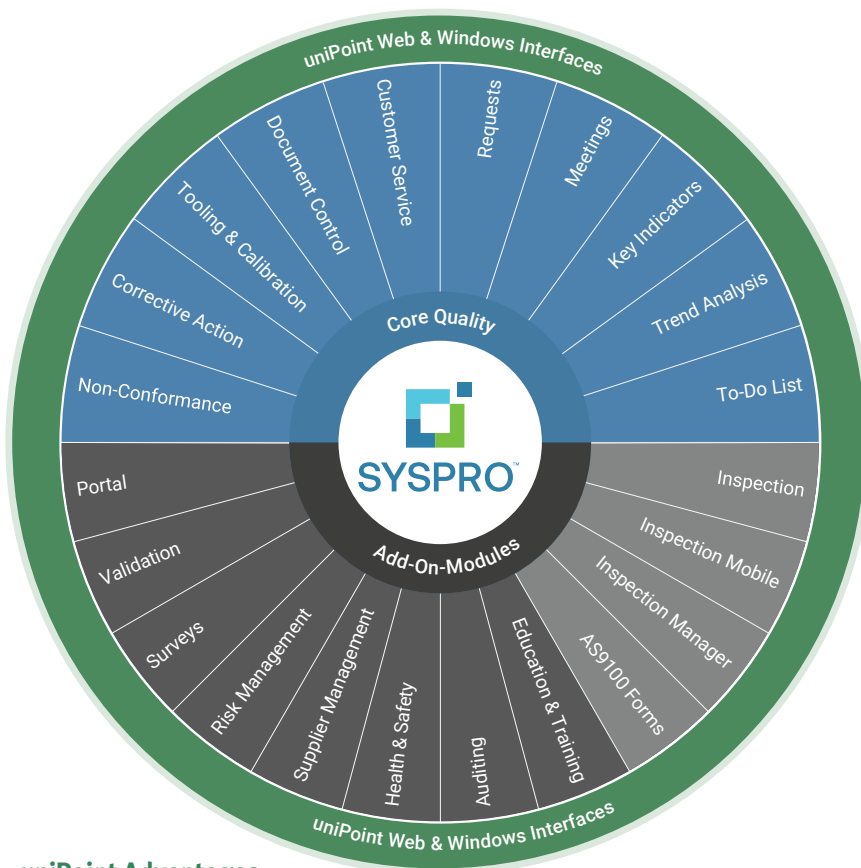

Simplicity
Our 2000 customers across North America and the European Union confirm that uniPoint Software is very easy to use. This translates into a fast learning curve and reduced on-going training costs. Our interface promotes engaged users. You will see the results from this user-friendly solution almost immediately.

Integration
The uniPoint suite has the unique ability to integrate data from multiple ODBC-compliant databases into our application. Imagine the opportunity to eliminate redundant data entry - and leverage the data from your existing ERP system. We also offer a stand-alone product.

Create, Link, Communicate, Track, and Manage the Life Cycle of Quality Activities and Documents

Circular diagram: uniPoint Web & Windows Interfaces. Core Quality modules — Document Control, Customer Service, Requests, Meetings, Key Indicators, Trend Analysis, To-Do List, Tooling & Calibration, Corrective Action, Non-Conformance. Add-On-Modules — Portal, Validation, Surveys, Risk Management, Supplier Management, Health & Safety, Auditing, Education & Training, AS9100 Forms, Inspection Manager, Inspection Mobile, Inspection. Center: SYSPRO.

uniPoint Advantages

- ›› 800 Quality Metrics (KPI's)
- ›› Unlimited Attachments
- ›› View Historical Audit Trail
- ›› Broadcast e-mail Capability
- ›› ISO Compliance Tool
- ›› Integrate or run Stand-alone
- ›› Manage Quality Meetings
- ›› 3-6 Month ROI
- ›› Export Reports to MS Office, e-mail or PDF

> "Using the uniPoint Continual Improvement Suite, we discovered that we were spending $6,000 per month, or $72,000 per year in Quality costs that we had no way to track before. A small improvement in these areas helped us pay for the software many times over, and in just a few months."
> — Mike Malone, Quality Manager, J.R. Stephenson

SYSPRO

Enterprise Quality Management Software

Technology

The uniPoint Windows Suite was developed using Visual Studio .NET. Our new mobile-first design Web interface was developed using Google Angular, CSS3, HTML5 and C#. This allows uniPoint to run on any internet enabled computer, tablet or mobile phone. The reporting engine for both interfaces is universal: Reports are written in Crystal, allowing our users to easily modify and create new quality reports and filters.

Visibility & Tracking

You can send electronic NC/CA documents and To-Do notification using e-mail. Recipients can then add their input and forward the quality record to its next stage. uniPoint Full and Lite users are concurrent and are sold at two different price points, allowing for full-functional or view-only capabilities. Full users can be setup with different access rights per module: No Access, Read Only, Edit or Full Rights.

Statistical Analysis

While saving time compiling reports and maintaining spreadsheets, you can streamline the preparation for your quality audits with over 100 continual improvement management reports.

Continual Improvement

With the uniPoint suite you can evolve to a "paperless quality system" where all documents can be shared, viewed or e-mailed. Everyone with security access can view relevant documents from their own workstation or mobile phone to stay informed of the status of each quality record.

Return on Investment

Research shows that the costs of poor quality can range from 15%-40% of business costs (e.g., rework, returns or complaints, late deliveries, reduced service levels, lost revenue). Company CFO's boast about getting quick payback on their uniPoint Suite investment – most within 3-6 months.

Continual Improvement Quiz

Do you want to understand the total administrative cost of quality in your organization?

Are you always scrambling before an audit to get your data organized?

Does your quality system allow for the assignment and tracking of user tasks, with To-Do Lists?

Do you want to evolve your company from a reactive to a proactive preventative maintenance model?

Do you continually fail to meet your external auditor's requirements due to poor document control?

Does your company have a dynamic repository for education & training records?

Could you benefit from a solution that creates flexible surveys and analyzes customer, supplier and employee responses?

Is your hazardous material documentation disorganized and out of date?

Does your ERP/MRP system have a weak quality module that falls short of effectively managing your quality process?

Are you interested in changing your quality department from a cost center, to a measurable cost-savings center?

If you have answered YES to one or more questions above, please continue your exploration of the uniPoint Quality Management System by e-mailing sales@unipointsoftware.com or visiting our website at https://www.unipointsoftware.com
